

Set-In Sleeve with Side Panels

Use CMYK Colors

We do not print with Pantones, therefore they will not be accurate

Raster Artwork:

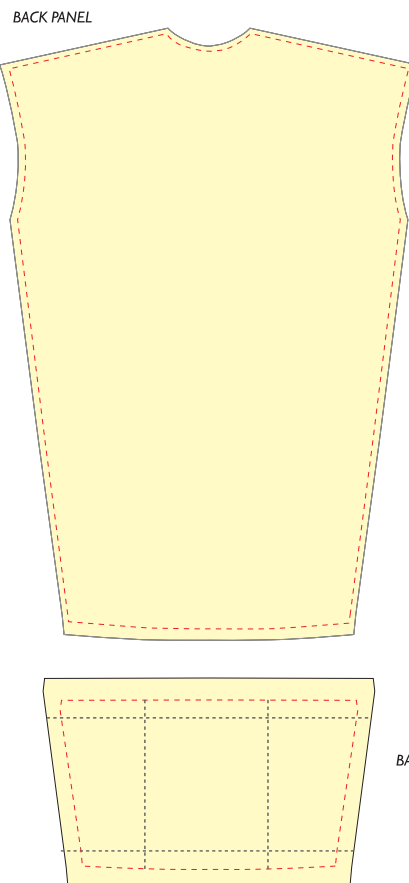

We recommend using vector artwork (.eps, .pdf, .ai). Vector art scales without losing quality. However, if you choose to use any raster art then we would need it set up properly.

Raster artwork needs to be sent at 100% of the final size it is to be used on your design, with a resolution of at least 150 dpi (dots per inch).

Example:

The logo is 4" x 6" @ 72 dpi, and you wish to print that logo at a size of 8" x 12". This logo would lose quality and print poorly. If your logo is 4" x 6" @ 300 dpi, we would be able to scale to 8" x 12".

Send all raster images individually and at full size

Dashed Red Lines indicate sewing seams
